

Hello!

Thank You very much for this purchase,

In order to obtain the project's STL files You now need to rename (also changing extensions) the following downloaded files (their number may vary depending on project's 3D data amount):

- "3D.zip.pdf" to "3D.zip"
- "3D.z01.pdf" to "3D.z01"

- and so on, with all files (if existing in your download):

- "3D.z02.pdf" to "3D.z02"
- "3D.z03.pdf" to "3D.z03"
- "3D.z04.pdf" to "3D.z04"
- ...
- "3D.z99.pdf" to "3D.z99"

...then extract the STL files from the "3D.zip" archive.

In case of any troubles please let me know (via contact@euroreprap.eu).

The best printing effect is when extrusion width is set to 0.41mm and the layers have 0.2mm height.

Good luck and have fun! :)
